Redefining
security with
advanced
access systems

Since 1968, Alluser Industrie Srl has been developing, designing, and marketing automatic access systems worldwide, characterised by high reliability and ease of installation and maintenance. Choosing Alluser not only guarantees you a product at the cutting edge of technology but also adds a touch of elegance to your environment.

Alluser systems are available as single or double portals, in rounded or square shapes so as to best suit your entrance requisitions, available space, design guidelines and access flow. Additionally, Alluser has introduced REV190, the brand new security revolving door. For more information about our wide range of solutions, please visit our website: www.alluserindustrie.com

REV190 is a high-security, fully automatic 4-leaf revolving door with a wide range of security options.

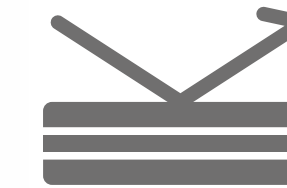

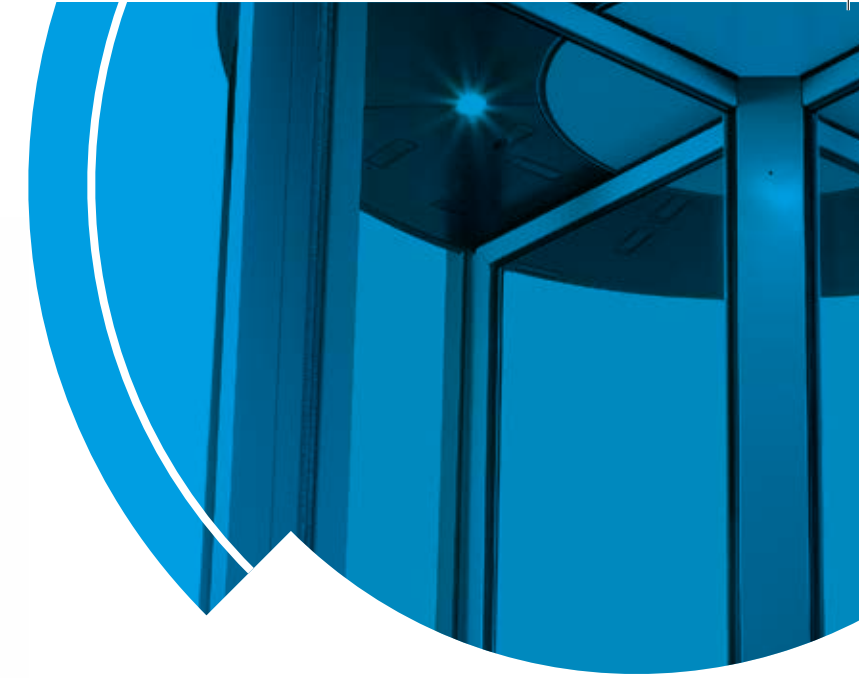

[A large, empty rectangular box intended for the name and contact information of the authorized distributor.]

Why choose REV190?

Security revolving door approved to LPS1175: Issue 8 Security ratings A1(SR1), B3(SR2), C5(SR3)

LPS1175 ISSUE 8

The LPS 1175: Issue 8 (Loss Prevention Standard) certifies intruder-resistant building components, rating the effectiveness of physical security products. REV190 is the first automatic revolving door to meet this standard. Furthermore, Alluser's security portals are LPS1175 standard compliant.

3 LEVELS OF ATTACK RESISTANCE

REV190-S1: A1 (SR1)

The portal model REV190 - S1 has been approved A1 (SR1) security rating, as per the Certification number 1479q/02.

REV190-S2: B3 (SR2)

The portal model REV190 - S2 has been approved B3 (SR2) security rating, as per the Certification number 1479q/03.

REV190-S3: C5 (SR3)

The portal model REV190 - S3 has been approved C5 (SR3) security rating, as per the Certification number 1479q/01.

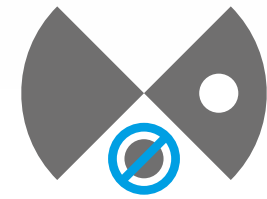

1

ATTACK RESISTANT

The world's first LPS1175 Issue 8 certified revolving door A1(SR1), B3(SR2) and C5(SR3). Designed to be attack resistant at any time - day or night. No additional night sliding doors or interventions required to improve the resistance.

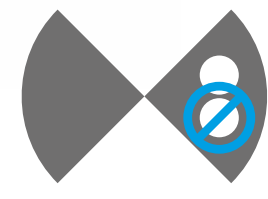

2

ANTI TAILGATING SYSTEM

Allows only authorised people to pass through the door, blocking all unauthorised people to pass through different door segments.

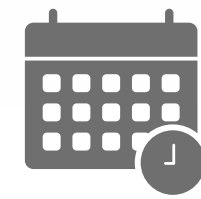

3

ANTI PIGGYBACKING SYSTEM

Permits only one authorised person to pass through a single door segment, preventing unauthorised individuals from following in the same door partition.

4

PROGRAMMABLE OPERATION

Allows you to define different operating modes, such as directional or bi-directional, lockdown mode, idle mode, automatic or manual mode, ensuring adaptability to your specific needs and preferences.

5

ADDITIONAL KEY FEATURES

- Easy to integrate with any access control system
- Throughput up to 30 people per minute
- Fully automatic
- Highly reliable.
